Where great ideas get developed!
Où les grandes idées se développent!

> " For each of our interventions, we guarantee a high level of competence, careful planning, strict control of costs and a constant search for the most advantageous solutions for our customers. "
>
> **Cristian Pamfiloiu,**
> **President, Inter DataSoft Inc.**

Our services allow business to refract control over their IT strategies and infrastructures while benefiting from reduced operating costs and risks without compromising service delivery to end users and their clients.

We assume responsibility for operations delivery, drawing on IT governance best practices while focusing on quality and competitive pricing. We build lasting partnerships based on trust and transparency.

INNOVATION & KNOWLEDGE

InterDataSoft Inc. is a software development company dedicated to provide powerful, reliable and high quality applications with successful business results.

At **InterDataSoft**, the innovation of new ideas and technology are influenced by our desire to success. We care about quality, reliability, seamless integration and products that act intuitively and friendly at any level of your business. Our long-terms commitment is to build a bridge between humans, processes and machines through state-of-the-art software technology.

We innovate new products through our imagination and your ideas! We believe in thinking differently by making our products beautifully designed, simple to use and very user-friendly. **InterDataSoft** was founded with the vision of producing innovative and affordable software or solutions to enable people and businesses to realize their full potential.

Powering Accurate Data

Timely, accurate data is the key to success in today's fast-paced, information driven world. Quick access to critical data across your enterprise will enable your organization to recognize significant saving, streamline operations and maximize growth.

Our systems and services represent a successful marriage of people skills, dedication to database accuracy, and computer resources. It's a total company management concept for using human resources more productively.

Our solutions can empower your business to easily manage complex data by providing your company with the right information, in the right format and at the right time.

SOFTPLATE

Balancing technology while controlling costs

SURFACE FINISH TREATMENT

Our system was specifically designed for the Surface Finishing industry (anodizing, plating, painting, galvanizing, etc). It covers all administrative and production requirements linked to this kind of business.

MACHINE SHOPS

We have recently attached additional new modules that are compatible with the machine shops industry, thereby making the link between the design of parts and the metal treatment that is required to complete the job.

MANUFACTURING PLANTS

In this software, everything has been done to simplify your everyday tasks, to reduce your operating costs and to increase the effectiveness of your resources.

SoftPlate is entirely developed with the latest ".NET" technology and SQL databases Our reports are created with Crystal Reports.

The system is compatible with Windows **(Vista /Win7 /Win8)**.

SAME PART-NUMBER

- **MULTIPLE REVISIONS**
- **MULTIPLE PROCESS-SHEETS**
- **MULTIPLE CUSTOMERS**
- **MULTIPLE PRICES**

TRACABILTY & EFFICIENCY

SAME NUMBER FOR ORDERS/SHIPMENTS/INVOICES/CREDITS

SoftPlate offers the most efficient traceability method to track your day-to-day production. Our special algorythm uses the same unique number for the following operations (even for the partial ones). From Ordering to Invoicing the system uses the same number which makes it easy to track and follow.

Same part for multiple customers

The industry of surface-finish treatment is considered as a "service" type industry and our system knows how to manage this. Indeed, the same part-number can belong to multiple customers but with different prices and specifications.

You can clone existing parts and processes. This avoids time consuming and unnecessary data re-entering.

Quality management through webcam detection?

Yes, all items (in/out) can be registered and inspected with an accurate resolution and a perfect traceability through webcams.

Flexible and with an extremely intuitive design, **SoftPlate** also gives people the tools to fuel business productivity and enabling people to make confident decisions and respond quickly to new marketplace opportunities. All of our interfaces are designed following the same standards with an almost identical appearance of screens and menus, regardless of the type of operation. This allows a quick employee's training and a greater efficiency in daily operations.

DASHBOARD & SCHEDULER

- Based on specific color chart
- Based on barcoding technology

Our software has an extremely powerful dashboard and each order is automatically inserted into a production calendar scheduler. The management and floor-employees can visualize their production commitments in a real-time mode and based on predefined color-chart.

SOFTPLATE

AN AFFORDABLE AND EFFECTIVE MRP SYSTEM
Really focused on the needs of "service-type" enterprises!

There is always a gap between knowing that you need an easy-to-manage and reliable system and the time when you know everything is under control with such a system in place. It may be easy to do it yourself, but it will take you valuable time and resources you don't necessarily have. So why not take advantage of **SoftPlate** which is an easy to use software, an efficient and powerful system which was specifically designed to cover all plating needs for more than 15 years?

The majority of screens are almost identical.

We guarantee a ROI (Return on Investment) within the 1st year of operation. With **SoftPlate**, you're not only trying to cut costs - you are actually cutting the costs by reducing manufacturing costs, by improving your production quality and centralize your data in the most efficient way. **SoftPlate** will automate and streamline your entire manufacturing tasks and processes—creating major savings.

Modules

Ressources Management

- Customers, Suppliers, Contacts, CRM
- Sub-Contractors, Employees

Part-Number Management

- Same Part – Multiple clients – Multiple revisions
- Multiple prices (UNIT / WEIGHT / LOT / MIN-CHARGE)
- Type of component / material
- Same Part – **Multiple Process-Sheets**
- Sizes, Dimensions and Units of Measure (U/M)
- Images and documents linked to each part-number
- Additional specifications and detail remarks

Manufacturing management

- Quotes, Order-Entry, Purchase-Orders, Shipping, Invoicing, Credits/Debits, Receiving, Sub-Contracting, Cost-Evaluations
- Raw-Material, Purchassing
- Equipment planning, Maintenance planning
- Equipment calibration
- Non-Conformance certificates
- Quality management (via webcams)
- Inventory management (multi-warehouse)
- Quality-Control forms
- Training and support data tracking
- Employees database and disciplinary management
- Dashboard and production scheduler

Tools

- Export data to Excel, PDF, etc.
- View and Link images to parts or to quotes
- Filters, graphs, group, sort and other dynamic and real-time data analysis
